Pure Warranty Statement for Australia

This statement replaces any reference to warranty which may be contained elsewhere within this manual.

What do you need to do now?

Option 2: Or you can do nothing other than keep your proof of purchase as evidence of your purchase date. This proof of purchase would need to be presented if warranty service was ever required.

If you have any questions about your warranty you can call us toll free 1800 988 268.

What's covered by this warranty?

• Pure agrees to refund, repair or replace, at your election, without charge to you, any part found to be defective during the warranty period.
• If equipment has been used according to its accompanying instruction manual and is used in a domestic situation, a two year warranty period applies (excludes rechargeable ChargePAK where fitted. A one year warranty period applies to all ChargePAKs).

How do you make your claim?

Call 1800 988 268 for instructions on how to return your Pure product for warranty service or go to http://support.pure.com/au/ and complete the contact us form.

What's NOT covered by this warranty?

Under this express warranty Pure will not be liable for loss or damage of any kind whatsoever, whether direct, indirect, incidental, consequential or otherwise.

• Replacement of parts due to normal wear and tear.
• Products with serial number defacement, modification or removal.
• Water damage or corrosion caused by dampness.
• Any damage or deterioration due to shipment.
• Any product which has been subjected to misuse, abuse or accident.

Australian consumers — The benefits to the consumer given by this express warranty are in addition to other rights and remedies of the consumer under a law in relation to the goods or services to which this warranty relates. Our goods come with guarantees that cannot be excluded under the Australian Consumer Law, You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure.

Pure is distributed and supported in Australia by PIONEER ELECTRONICS AUSTRALIA PTY LTD, 5 ARCO LANE, HEATHERTON, VICTORIA, 3202.
Thank you for choosing Evoke 2S. This manual will get you up and running in no time and explains how to make the most of Evoke 2S’s great features. If you need additional help with topics not covered in this manual, please visit the Pure support pages at www.pure.com.
Safety Instructions
1. Do not use the radio near water.
2. Do not remove screws from or open the radio casing.
3. Keep the unit away from heat sources and do not place sources of naked flames (such as candles) on the unit.
4. Unit ventilation should not be impeded by covering the ventilation openings with papers, curtains etc.
5. Do not place the unit in closed bookcases or racks without proper ventilation.
6. Do not place any objects containing liquids on the unit, such as vases.
7. Ensure that the mains plug is readily accessible in case isolation from the mains is required.
8. Excessive sound pressure from earphones and headphones can cause hearing loss.

Getting started

Quick set up

1. Unclip the aerial and fully extend it (steps A and B).
2. Insert the supplied mains cable into the socket on the rear of the radio (C).
3. Connect the mains plug to the mains supply (D), make sure the power switch (E) is on and press the Standby button.

2. Pure is displayed briefly on-screen.

3. Wait for Evoke 2S to complete an Autotune and find all available digital stations. When the Autotune is complete, a station will start playing.

Rear connectors and controls

- **USB**
  - USB connector for upgrades only. Mini-B type.

- **Aux In**
  - Analogue stereo input for iPod, MP3 player, etc.

- **Line Out**
  - Connect to an external amplifier.

- **3.5 mm stereo headphone socket**

- **Mains socket and power switch**
Using your Evoke 2S

Changing source

Press the Source button to choose between digital radio, FM radio or Auxiliary input.

Changing stations

When listening to digital radio

Turn the Tune dial left or right to browse through the list of available digital stations. The current station remains at the top of the screen. Push the Tune dial to change the station.

When listening to FM radio

Seek Tuning

Turn and release the Tune dial right or left to seek to the next or previous FM radio station that has a strong signal.

Manual Tuning

1. Change the FM radio tuning mode to ‘Manual’ (page 13).
2. Turn the Tune dial right or left to step up or down 0.05 MHz.
Pausing and controlling scrolling text

1. When ‘Scrolling text’ information is displayed in either digital or FM radio, push the **Tune** dial to pause the scrolling text.

   ![BBC Radio 6Music Now playing: Race For T](image1)

   ![BBC Radio 6Music Playing: Race For Th](image2)

2. Turn the **Tune** dial right and left to scroll forwards and backwards through the text. To exit push the **Tune** dial again.

   ![Tune](image3)

Changing the information shown on screen

You can change the information that is displayed on screen. Press the **Info** button and repeat to cycle through the information display options available for the current audio source.

**Scrolling text**
Information broadcast by most digital radio stations and some FM radio (RDS) stations.

**Signal strength**
Displays a meter illustrating the strength of the digital or FM radio signal.

**Signal quality**
Displays digital signal quality: 85 to 100 good; 70 to 84 OK; 0 to 69 poor.

**Full screen time**
Displays the time, mode icon and an alarm indicator, if set.

**ChargePAK status**
Displays a charging or percentage power remaining indicator for a ChargePAK E1 rechargeable battery pack.
Tone control

Adjusting the bass

1. Push the Tone button and push the Tune dial to select ‘Bass’.
2. Turn the Tune dial right or left to adjust the bass level and push to set.

Adjusting the treble

1. Push the Tone button and push the Tune dial to select ‘Treble’.
2. Turn the Tune dial right or left to adjust the treble level and push to set.

Pausing and rewinding live digital radio

Evoke 2S enables you to pause and rewind digital radio by saving an audio ‘buffer’ of the current station. You can rewind for approximately 10-15 minutes depending on the broadcast quality of the current station and/or how long you’ve been tuned to the current station.

1. Press || to pause the current station.
2. When the audio is paused you can do the following:
Storing and selecting presets

Store up to 50 of your favourite digital or FM radio stations in a combined list.

**To quick-store a station to a preset button (1–5)**

Tune to the digital or FM radio station you want to store. **Press and hold** one of the numbered Preset buttons (1–5) for two seconds until you see the ‘Preset saved’ message on the bottom line.

**To store a station to the preset list (1–50)**

1. Tune to the digital radio or FM radio station you want to store.
2. Press and release the 6+ button to view the numerical list of stored presets, then turn the **Tune** dial to choose any Preset number between 1 and 50. You can overwrite existing presets.
3. **Press and hold** the 6+ button (or the **Tune** dial) until you see the ‘Preset saved’ message. The current digital/FM radio station is now stored to that number on the Preset list.

**To recall a preset when listening to digital radio or FM radio**

1. To tune to Presets 1 to 5, press the corresponding numbered button on the unit (1 to 5).
2. To access the full list of presets (from 1 to 50), press and release the 6+ button, turn the **Tune** dial right or left to scroll through the list of presets, then push and release the **Tune** dial to tune to the selected preset.
Setting the alarm & timers

### Setting the alarm

Evoke 2S has an alarm which switches the radio on (if in standby mode) and tunes to a digital or FM radio station or sounds an alarm tone.

1. Press the **Alarm** button.
2. Push the **Tune** dial to select ‘Set alarm’, scroll to ‘Alarm on’ and push the **Tune** dial to select. The alarm is now active.
3. Push the **Tune** dial to select ‘Set time’. To set the time you want the alarm to sound turn the **Tune** dial to adjust the hours and then push to confirm. Repeat to adjust the minutes.
4. Push the **Tune** dial to select ‘Set days’.
5. Turn the **Tune** dial to choose when you want the alarm to repeat. The available options are ‘Daily’, ‘Weekday’, ‘Weekend’, ‘Saturday’, ‘Sunday’, or ‘Once only’.
6. Push the **Tune** dial to select ‘Set mode’ and choose the type of alarm you want to sound: digital radio, FM radio or tone. If you select ‘Tone’, there are no further options.
7. For digital radio and FM radio alarms only, push the **Tune** dial to select ‘Select station’ and choose the radio station you want to use for the alarm.

#### For digital radio alarms
Select a digital station from the station list.

#### For FM radio alarms
Choose between ‘Last tuned’ or an FM preset station. If you selected ‘Last tuned’ the alarm will tune to the last FM station you listen to before the alarm sounds.
8. If you have selected a digital or FM radio alarm you can push the Tune dial to select ‘Alarm volume’ and turn to adjust the volume level for the alarm from 1 (very quiet) to 32 (very loud).

That’s it! You can see if the alarm is currently switched on in the ‘Full screen time’ display (see page 7).

**Note:** An outlined bell shows that the alarm will not sound within the next 24 hours.

**Note:** The alarm function does not work when Evoke 2S is being powered by the ChargePAK E1.

### Cancelling an alarm

When a tone alarm is sounding, push the Tune dial or press the Alarm or Standby button to cancel the alarm. To cancel a digital radio or FM radio alarm, press any button. The alarm will cancel and the button will perform its normal function.
Setting the kitchen timer

Evoke 2S has a countdown timer which will sound an alarm after a set time period - handy for use in the kitchen.

To set the kitchen timer

1. Press the **Timer** button, turn the **Tune** dial and push to select ‘Kitchen timer’.
2. Turn the **Tune** dial to change the hours and push to confirm. Turn again to change the minutes and push to confirm and start the countdown timer.

The alarm will sound after the time period you have set whether the radio is on or in standby. Cancel the alarm tone by pressing any button on the radio.

To stop and reset the kitchen timer

To stop and reset the countdown timer to zero before it sounds a beeping tone, press and hold down the **Timer** button for three seconds until you see the message ‘Timers cleared’.

Setting the sleep timer

Evoke 2S has a sleep timer that switches your radio into standby (or off if powered by a ChargePAK) after a set time period.

To set the sleep timer

1. Press the **Timer** button, turn the **Tune** dial and push to select ‘Sleep timer’.
2. Turn the **Tune** dial to increase the duration of the sleep timer from 15 to 90 minutes in fifteen minute intervals. Press the **Tune** dial to start the sleep timer.

You can see the amount of time remaining before the kitchen timer sounds in the ‘Full screen time’ display (see page 7).

To cancel the sleep timer

Select ‘Sleep timer’ (as above) and set the duration of the sleep timer to ‘Sleep off’. Alternatively, press and hold the **Timer** button for three seconds until you see the message ‘Timers cleared’.
Setup options

Press the **Menu** button to access the options menu, turn the **Tune** dial to scroll through the options and push the **Tune** dial to select.

**Options available in digital radio**

**DRC**
The DRC (Dynamic Range Control) value makes the quieter sounds in a digital radio broadcast easier to hear at low volume or in a noisy environment. Check with the broadcasters to find out if they use DRC.

- **DRC full** — Applies the DRC level as sent with the broadcast.
- **DRC half** — DRC level is set to half that sent with the broadcast.
- **DRC off** — Any DRC level broadcast will be ignored.

**Autotune**
Scans all digital radio frequencies for stations and automatically adds any new stations found to the station list. This may take a few minutes. To stop an Autotune press **Menu**.

**Station order**
Change the order that digital radio stations appear in the list.

- **Alphanumeric** — Lists all stations in alphanumerical order.
- **Active station** — Lists active stations first on the station list.
- **Multiplex** — Lists stations in groups according to their multiplex - a group of stations broadcast by the same operator.

**Trim stn. list**
Removes inactive stations from the station list.

**Options available in FM radio**

**FM tuning mode**

- **Seek** — When you turn the **Tune** dial, the radio tunes to the next station with a good signal.
- **Manual** — When you turn the **Tune** dial, the radio tunes up or down the FM radio frequency range by 0.05 MHz.

**FM stereo mode**
Choose from Stereo (default) or Mono. Mono may improve audio clarity where stereo signals are weak.
General options

Adjusting the display
You can adjust the brightness and time-out duration of the display for when the unit is switched on and in standby. To change display options:

1. Press **Menu**, scroll to ‘Display settings’ and push the **Tune** dial.
2. Now choose either ‘Active’ to change settings that apply when the unit is switched on, or ‘Standby’ to change settings that apply in standby.

Changing the display time-out duration
Select ‘Duration’ and choose from the following two modes:
- **Always on** The screen is always set to your preferred brightness level.
- **Timed off** The screen is set to your preferred brightness level when a button is pressed and then switches off after 7 seconds of inactivity.

Changing your preferred brightness level
Select ‘Brightness’ and choose from the following options:
- **Automatic** The brightness of the screen adjusts automatically depending on the level of light in the room (default).
- **1–10** Turn the **Tune** dial to vary the brightness level between 1 (very dim) and 10 (very bright) and push to confirm your preferred setting.

Set clock
You can manually set the time and date if required. If you have a digital radio signal and/or a strong FM radio (RDS) reception these will be updated automatically.
Using a ChargePAK

ChargePAK makes Evoke 2S truly portable, so you can enjoy the programmes you love in the garden or at the beach. Because it’s rechargeable ChargePAK is much cheaper than regular batteries. It’s also more eco-friendly because it reduces the amount of toxic substances sent to landfill. And, because it’s a fit-and-forget solution that charges whenever your radio is connected to the power outlet, it’s much more convenient than standard rechargeable batteries.

Installing a ChargePAK

1. Switch your Evoke 2S off and disconnect it from the power supply.

2. Open the battery compartment and push the ChargePAK connector plug into the socket in the compartment. Line up the ridges on the plug with the slots in the socket. Do not force the plug.

3. Insert ChargePAK into the battery compartment.

4. Replace the battery door and connect your product to a power outlet.

5. ChargePAK will begin charging. When charging your ChargePAK for the first time or after an extended period of inactivity we recommend that you charge it for around 24 hours to ensure full battery power.

Note: It is normal for your ChargePAK to get warm, especially during charging. Your ChargePAK will give years of trouble-free use under normal circumstances, but like all rechargeable batteries its efficiency will gradually reduce with age.

Important: Evoke 2S can only be powered with a Pure ChargePAK E1 and is not compatible with any other batteries, either disposable or rechargeable, or any other ChargePAK model.
Help and Specifications

Secondary and inactive stations
(<</>>) Secondary digital radio services
Some stations have accompanying secondary services which provide extra information or alternative content and may only be broadcast at certain times. If a station has a secondary service available, the station shows ‘>>’ next to its name in the station list and the secondary service appears next to the station in the list. A secondary service has a ‘<<’ before its name in the station list.

(?) Inactive or unavailable digital radio stations
Inactive or unavailable stations appear on the station list preceded by ‘?’ and cannot be tuned to. A station may be inactive or unavailable because the station is not broadcasting at the current time (check with the station), you are out of range or it has stopped broadcasting altogether.

Hints and tips

Display says ‘No stations available’ or ‘Station not available’
Use Autotune (see page 13) to search for stations. Try adjusting your aerial or radio position.

Receiving new digital radio stations that have started broadcasting
Use Autotune (see page 13) to scan and add any new digital services to the station list.

Using the alarm when a ChargePAK E1 is fitted
When Evoke 2S is powered by a ChargePAK E1 for portable listening, i.e., a ChargePAK rechargeable battery is fitted and the unit is not connected to mains power, Evoke 2S switches off completely when the Standby button is pressed and the alarm will not sound. In this case, the message ‘Disabling alarm’ will be displayed when the Standby button is pressed.

Resetting your radio
Resetting Evoke 2S removes all presets, clears the station list and resets all options to defaults.
1. Press and hold the Menu button for three seconds to enter the hidden menu.
   Select ‘Factory reset’.
2. Push the Tune dial within 8 seconds to confirm the reset or the reset will cancel.

Software Updates
Software updates for your Evoke 2S may be made available in the future. If you register your product and include a valid e-mail address you will receive notification of software updates (register at www.pure.com/register). Alternatively, visit http://support.pure.com at any time to check for available software updates.
Technical Specifications

General
Stereo digital radio with full Band III, L-Band and FM reception. ETS 300 401 compliant and capable of decoding all DAB transmission modes 1-4 up to and including 192 kbps. Supports FM RDS and RadioText. Future upgrade supported for DAB+

Frequency ranges
DAB Band III 174-240 MHz, DAB L-Band 1452-1490 MHz, FM 87.5-108 MHz.

Speakers
Two mid-range 3" drive units + two ¾" dome tweeters.

Inputs
220-240V AC power socket for supplied power cable.
3.5mm Line-in for auxilliary devices. USB (mini-B type) for product upgrades.

Outputs
3.5mm headphone, 3.5mm line out (analogue).

Presets
50 digital radio and 50 FM radio presets.

Display
High contrast yellow graphical 128 x 22 pixel Organic LED (OLED) display.

Power cable
Detachable mains lead supplied.

Aerial
Removable telescopic aerial supplied.

Dimensions (mm)
210 high x 290 wide x 120 deep.

ChargePAK
ChargePAK E1 rechargeable battery pack (available separately).
