Glossary of Pure Connect App Icons

Tap this icon to stream wirelessly to the Jongo family that is connected to your network

Quick access to your favourite content

Share tracks with friends

When you go into settings and select jongo devices found, you may have several Jongos and want to identify one. If you tap the circle icon the jongs LED will start to pulse orange so you can identify it. Tap the icon again to stop this - This may be helpful if you want to rename your Jongo devices.

On the same screen as the Jongo identifier icon you will also see this symbol. This will show you the wifi signal strength you have. This may be useful to check if you are having any connection issues as a weak wifi signal strength may affect connectivity.
