Streaming to a Jongo from a Pure radio

Pure Support - UK - 2013-12-19 - in [Wireless Music Systems](#)

Streaming to Jongs from a Pure radio

Due to the ever growing feature set of Jongo and in order to ensure that we are able to maintain other products' functionality to the high specification and quality levels we wish to, we have had to remove the ability to stream audio to the Jongo family from some Pure connected radios (Sensia 200D, One Flow and Evoke F4). This does not affect your ability to stream to those radios from PCs, Macs or by using the Pure Connect app from a smart device.
